HIGH PERFORMANCES EVAPORATIVE COOLER

Waiting at loading
and unloading,
you can rest with the
ENGINE NOT RUNNING

Bycool **Evolution**

YOU ARE SAVING with optimum comfort

dirna[®]
Air conditioning for vehicles

PROTECTION OF THE VEHICLE'S ENGINE

It works without running the engine, so it is suitable during loading and unloading operations.

SAVING AND COMFORT

It doesn't consume fuel. It is possible to circulate or to have a rest in very good conditions of temperature and humidity, saving lodging expenses.

FULLY ECOLOGICAL

It only consumes some water. Respectful with environment.

2 YEARS WARRANTY

All spare parts.

TECHNICAL FEATURES

- Control of all the functions from the remote control by radio frequency (RF) or from the electronic keyboard.
- It is not necessary to point to the sensor, avoiding distractions during driving.
- Aerodynamic design.
- Two tanks, one outside for water supply, with a capacity of 35 litres, and the second one anti-overflow, integrated into the equipment.
- Engine:
 - Double turbine.
